#### TOWN OF TAYLOR, MISSISSIPPI NOTES TO FINANCIAL STATEMENT

#### Note 1: Summary of Significant Accounting Policies

#### **Reporting Entity**

The financial statement of the Town consists of the general governmental fund.

The Citizens of Taylor have elected to operate under a Code Charter as permitted by Mississippi Statute 21-3-3, which prescribes a Mayor and Board of Aldermen form of government.

In evaluating how to define the government, for financial reporting purposes, management has considered all potential component units. The decision to include a potential component unit in the reporting entity was made by applying the criteria set forth in accounting principles generally accepted in the United States of America. The basic - but not only - criterion for including a potential component unit within the reporting entity is the governing body's ability to exercise oversight responsibility. The most significant manifestation of this ability is financial interdependency. Other manifestations of the ability to exercise oversight responsibility include, but are not limited to, the selection of governing authority, the designation of management, the ability to significantly influence operations, and accountability for fiscal matters. A second criterion used in evaluating potential component units is the scope of public service. Application of this criterion involves considering whether the activity benefits the government and/or its citizens, or whether the activity is conducted within the geographic boundaries of the government and is generally available to its citizens. A third criterion used to evaluate potential component units for inclusion or exclusion from the reporting entity is the existence of special financial relationships, regardless of whether the government is able to exercise oversight responsibilities. Based upon the application of these criteria, there are no includable or excludable potential component units.

#### **Fund Accounting**

The accounts of the Town are organized on the basis of funds and account groups, each of which is considered a separate accounting entity. The operations of each fund are accounted for with a separate set of self-balancing accounts that comprise its assets, liabilities, fund equity, revenues, and expenditures or expenses, as appropriate. Government resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be spent and the means by which spending activities are controlled. The Town of Taylor only has one type of fund and is categorized as follows:

**General Governmental Fund** - The General Fund is the general operating fund of the Town. It is used to account for all financial resources except those required to be accounted for in another fund.

#### TOWN OF TAYLOR, MISSISSIPPI NOTES TO FINANCIAL STATEMENT

#### Note 1: Summary of Significant Accounting Policies (Continued)

#### **Basis of Accounting**

Basis of accounting refers to when revenues and expenditures or expenses are recognized in the accounts and reported in the financial statements. Basis of accounting relates to the timing of the measurements made, regardless of the measurement focus applied.

The Town uses the cash basis of accounting as prescribed by the Mississippi Office of the State Auditor.

In the fund financial statements, governmental activities are presented using a cash basis of accounting. This basis recognizes assets, liabilities, net-assets/fund equity, revenues and expenditures/expenses when they result from cash transactions with a provision for depreciation in the proprietary fund statements. This basis is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America.

If the town utilized accounting principles generally accepted in the United States of America, the fund financial statement for the governmental fund would use the modified accrual basis of accounting.

Under the modified accrual basis revenues are recognized when measurable and available. Measurable means, being able to reasonably estimate the amount. Available means collectible within the current period or soon enough thereafter to pay current liabilities. Expenditures (including capital outlay) are recorded when the related fund liability is incurred, except for general obligation bond principal and interest which are reported when due.

#### Note 2: Report Classifications

Receipts and disbursements were classified according to requirements for small towns in the State of Mississippi as prescribed by the Office of the State Auditor.

With respect to the items tested, the results of those procedures and our compilation of the accompanying Statement of Cash Receipts and Disbursements and Schedule of Surety Bonds for Municipal Officers of the Town of Taylor, Mississippi, for the year ended September 30, 2020, disclosed no instances of noncompliance with state laws and regulations.
